

# Report on the First Symposium on Requirements Engineering for Information Security

Annie I. Antón, NC State University

NIAP Government Industry  
IT Security Forum

7 March 2001

# Background

- ◆ Sponsored by CERIAS & NIAP
- ◆ In conjunction w/ NCSU E-Commerce
- ◆ In cooperation w/
  - ACM SIGSOFT
  - ACM SIGSAC
  - INITA
- ◆ Goal: Forum for interaction b/w two communities w/ common interests, but limited contact to date.

# What Happened?

- ◆ Tutorial
- ◆ Invited address
- ◆ 12 technical papers
- ◆ 3 position papers
- ◆ 1 panel
- ◆ Special Issue of the Requirements Engineering Journal
- ◆ ...lots of discussion!

# A Few Observations

- ◆ Standards and common criteria are not enough.
  - Quality, privacy, usability, market acceptance, etc.
- ◆ Software engineering techniques exist, but are not applied often enough.
- ◆ Users & operators are integral, but often overlooked during design activities.

# What's Next

- ◆ SREIS 2002
  - <http://www.sreis.org>
- ◆ Proceedings are still available
- ◆ REJ Special Issue -- June 2001
- ◆ Continued interaction and discussion

And today, the NIAP Gov't/Industry Meeting!
